

Solartech Clean 750ml

Description

Product specially designed for cleaning solar systems and photovoltaic panels. Cleans and polishes in a single operation.

- Easy to apply.
- Fast drying on its own, leaving no unwanted streaks or marks.
- Great efficiency.
- Biodegradable.
- Does not contain dangerous components.
- Acid free.
- Contains no phosphates.
- Not emulsifiable.
- Non-polluting.

Due to its composition it does not affect other contact surfaces, such as plastics, rubber, aluminum. Does not clog sprinkler nozzles and/or cleaning equipment.

It allows a complete cleaning that maintains and guarantees 100% the performance of the surface where it is applied, maintaining the value of the investment and increasing the useful life of the surfaces. Its high cleaning power also provides a shine to the surface, creating a protective layer that prevents the redeposition of dirt caused by weather conditions, protecting the surface against corrosion and acting as a disqualifying agent.

The characteristics of the product and its optimal performance ensure maximum efficiency of solar systems and photovoltaic panels, allowing energy production/year to remain stable and constant.

Application

Apply spray on the surface to be treated and leave it to act for a minimum time of less than 5 minutes, depending on the dirt to be removed. Mechanical wiping cleaning is not necessary. Rinse after applying the product. It dries on its own. The regular cleaning maintenance plan will depend on the environmental conditions to which the surfaces are exposed.

Format

REF: 10266001
750 ml bottle
Box of 12 units
Full pallet 36. boxes
REF: 10266005
5 liter bottle
Box of 5 units
Full pallet 32 boxes

Physical properties

Appearance – Transparent liquid
Colour – Colorless
Density – 0,985 – 1,005 g/ml
pH 100% – 10,5 ± 0.5

Qualitative composition

Non-ionic surfactants
